

File Storage with EFS

A Click to Run™ solution from Tech Data

Business Challenge

IDC predicts that worldwide data storage will grow 61% by 2025. With an emphasis on business digital transformation, this number is expected to continue to grow rapidly, putting a strain on traditional on premises file servers and IT resources to keep up with this anticipated growth.

Introducing Tech Data File Storage with EFS

This solution leverages Amazon Elastic File Storage System to build a secure and highly scalable file storage environment in minutes. Choose your preferred file storage class based on business needs and how often files will need to be accessed.

File Storage with EFS is a flexible solution that supports a variety of uses cases including those for business critical applications, data analytics, content management, media files and much more.

This solution is available through our StreamOne Ion platform and can be deployed in fifteen minutes or less.

Cloud storage offers many benefits including cost savings, scalability, simplified management and enhanced security.

Key Features

- Virtual Network Creation
- AWS EFS Configuration
- Select Storage tier
- Flexibility and Scalability
- Select Deployment Region

Business Outcomes

- Reduced IT maintenance
- Lower hardware/CAPEX expenditures
- Improved business agility
- Accelerates digital transformation efforts
- Application portability

Why leverage Tech Data's Click to Run™ solutions?

Reduce Cost & Time

Reduce costs, time & risks by customising & deploying pre-architected, validated and tested solutions.

Offer More – Get More

Enhance your portfolio and increase your revenue by offering more options and solutions to your customers.

Faster Time to Market

Broad set of enablement resources to quickly build Cloud Solutions practices within your organisation
